

Sprint A Report 1 Feb 13th

(Scrum Master) James Darby, 260918837, james.darby@mail.mcgill.ca
Chrisovalantis Vatos, 260989496, chrisovalantis.vatos@mail.mcgill.ca
Wasif Somji, 261003295, wasif.somji@mail.mcgill.ca
Yassine Mimet, 260980175, yassine.mimet@mail.mcgill.ca
Jerry Hou-Liu, 260920691, jerry.hou-liu@mail.mcgill.ca
Phan Tran Tuan Khai, 260916543, tran.t.phan@mail.mcgill.ca
Abhigyan Praveen, 261047297, abhigyan.praveen@mail.mcgill.ca
Ali Khasawneh, 261006914, ali.khasawneh@mail.mcgill.ca
Haroun Guessous 260978815, haroun.guessous@mail.mcgill.ca
Rashya Anggaraksa, 260919363, rashya.anggaraksa@mail.mcgill.ca

We are using Shortcut to track our stories, their progress, state, attach tasks to them, and keep relevant docs. This report and the attached shortcut report pdf will summarize the Shortcut state as of February 13th, but you can view the up to date board by joining the shortcut with this link: <https://app.shortcut.com/invite-link/65c162b5-498f-4ad1-bbf5-36ca8f03b6d5>

The github for our project is public and available here:
<https://github.com/JamesDarby345/5LeagueFantasy>

Since the project proposal, the stories we completed are around the foundational work that needs to occur for the rest of the stories to be able to move forward.

They were not part of the original set of groomed stories from the proposal but were work we identified we needed to do at the sprint kick off meeting. Thus they are not fully groomed but meet the purpose of a story in the agile framework, to provide enough context to the team so the work could be completed.

Please see the shortcut, or the attached pdf report that **only includes the current state (Feb 13th)** of all the stories that were **updated in the last 7 days**. All other stories, including the product backlog, are as they were in the last report if they are not included in the shortcut report pdf. We believe we are capable of completing all the stories in the Sprint Backlog for this sprint.

The shortcut report pdf includes a title for which state the story is currently in, the name, description and tasks that we defined this week, as well as if the tasks are completed or not and the owner(s) of each story, the student(s) responsible for the work.

All team members refined stories and created the related tasks. The main foundational, and thus blocking, work has been completed by Chris & Yassine, so the rest of the stories should now be ready to be worked on.
